Those Dear Girls

Betty—Jack says I am the first girl he ever kissed.

Marie—I've known him to lie about other things, too.—Boston Transcript.

Whose fault is it when your husband is cross at breakfast?

If you hit your thumb with a hammer you wouldn't blame your thumb for hurting.

Then why blame your husband whose nerves may have been pounded by coffee, and whose rest probably has been broken by the irritation of the caffeine it contains?

If you stay awake half the night you don't feel any too cheerful.

The caffeine of coffee and the thein of tea are known drugs. If their use is persisted in, sooner or later the nervous system may give way.

Then you may have insomnia, or disturbed sleep. Your nerves and tissues will be robbed of that stability essential for normal and happy living.

You can avoid this possibility if you'll stop drinking tea and coffee and drink instead, rich, pleasing Postum.

Postum is the delicious cereal beverage with a coffee-like flavor. It affords the advantages of a hot drink, without the ill effects of tea or coffee.

Order Postum from your grocer today. Try it with the family for a few days, and see what a difference there'll be—how it will permit Nature to bring sound sleep and strong, sturdy, quiet nerves. Sold by grocers.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water; Postum Cereal (in packages) of larger bulk, for those who prefer to make the drink while the meal is being prepared; made by boiling for 20 minutes.

Methodist Episcopal church—Stead Thornton, pastor. Topic next Sunday morning, "The World We Live In and Our Relation to It." Evening topic, "Stability in the Faith." Do not miss these services. Why will people engage so frequently in simple and useless conversation on worthless and senseless topics and fight shy of church, where well composed hymns are sung, the inspired word is read, and the pastor uses his best effort to give out the result of his hard study during the week? Are you one of these indifferent ones? Can you afford to be so? Is it your credit as an intelligent person to remain in that class?

Watchmakers Use Dough to Pick Up Tiny Screws.

Two barrels of flour, or almost 400 pounds, are used every week in making watches at a well-known factory in New England which turns out from 2,000 to 3,000 watches a week. Since a baker uses three pounds of flour to five loaves of bread it follows that for every watch the maker uses the equivalent of almost a third of a loaf.

The flour is made into dough and the dough is used to handle the screws, rivets and other small parts. Each man in that part of the business has a lump of dough always at hand; and when he wants to examine a screw he jabs the piece of dough on it. Then, turning it over, he has a good chance to look at it with his watchmaker's microscopic eyeglass. Many of the screws are too minute to pick up easily with the fingers and many more, though large enough to be picked up, would be so covered by the fingers or the forepaws as to be almost hidden from sight.—Youth's Companion.

Health Is a Woman's Greatest Asset.

Contrast the cheerful happy woman with head erect, the glow of health on her cheeks, the elastic step and bubbling enthusiasm as she goes about her daily tasks, with the woman who suffers from backache, headache, dragging-down pains, nervousness and dependency. Such conditions are undoubtedly caused by woman's ailments which will yield to Lydia E. Pinkham's Vegetable Compound, which for many, many years has been restoring weak, ailing women to health and strength. Every woman who suffers in this way owes it to herself to at least give it a trial.—Adv.

WELLS RIVER

Big Wind of Last Week Does Lots of Damage.

Last Friday the big wind that lasted for a few minutes did a great deal of damage in this section. The porch roof of the golf club house and a portion of the roof proper was taken off and carried completely over the house and lodged in the driveway, completely blocking same. At the farm of William Holburn, just above the club, the entire roof on the ell part of the house was removed and section of the iron roof of the barn. A part of the iron roof was carried several miles in the wind. An old barn standing at the Whitehall farm was demolished and every board and timber was scattered, some for a great distance. On the Groton road several small houses were disturbed but the greatest damage seemed to be in the hilly section. A great many large trees, some of them very valuable, were blown down and roads were blocked in several directions for a few hours. At the club house Mulliken and Crabtree had just finished a round of golf when the wind and rain came and they, thinking that the end of the world had come, left in a hurry. They claim the sensation was wonderful.

An engine, a large hog, left the rails on the Woodville side of the Connecticut river bridge last Monday evening and toppled over on its side. This delayed the night trains for several hours. The night Boston train went by the way of White River while the northbound was able to leave Woodville about 3:30 a. m. with only a delay of a few hours.

Kilburn Powers, who has occupied a rent in the postoffice block for a great many years, moved into the lower rent in the Field house on Wednesday last. They are already engaged.

J. A. Moore and family motored on Sunday to Newport, N. H., where they spent the day with their daughter, Mrs. Cody.

The Rebekahs of this section held their district meeting in the village hall last Friday evening. After a supper served in the ladies' parlors, the ladies went to the village hall where work was done by the Lyndonville lodge. Lodges represented were the Lyndonville, West Burke, St. Johnsbury, Groton, Concord and Bradford. Despite the fact that the wind had destroyed all the wires and the village was without lights they all reported the meeting as highly successful.

Since last Saturday we are able to see a marked improvement in the electric lights. While they are still in voltage they are way ahead of what we have had in the past, particularly the first of the evening. Around eleven it is still necessary to light the oil lamps if you care to read. There are no lights in the day time and those owning motors in this section of Vermont are still obliged to let them stay idle.

Dr. Thomas and wife, in company with Seward French and wife, spent last Friday evening at South Ryegate where they attended a church supper at the Presbyterian church.

Timothy DeBois is spending his annual vacation visiting relatives in northern Vermont. He expects to be away from ten days to two weeks.

Fred Bailey of Washington, D. C., is spending a short week with his father and mother, Mr. and Mrs. Albert Bailey.

The shortage of water in this section is being felt to a great extent. In the river there was not enough water to turn the wheels and thus refill our reservoir and the well which was dug last fall has been dry for over ten weeks.

Miss Lillias Moore has resumed work at Bucks Drug store while Murray Wilbur has finished his work for the summer.

Punch, it is said, came from the East Indies, and the name is claimed to be derived from the Sanskrit word meaning "five," on account of its five ingredients—rum, tea, sugar, lemon and hot water.—New York Tribune.

For the sake of your babies see our baby today

FOR years this has been our hope—to develop a small hot-water radiator-boiler that would warm a modest home as perfectly as our larger heating plants have warmed mansions, cathedrals, and even the White House itself.

ARCOLA is the practical fulfillment of that hope. ARCOLA is the baby of the American Radiator Company.

It is unlike any heating plant you have ever seen. It is boiler, radiator and water-heater combined—as handsome as a fine phonograph and costing hardly any more.

ARCOLA creates and radiates warmth in the room where it is placed, and connected with American Radiators, it will heat every other room and provide hot water for bathing and washing as well.

Comfort, security and health are ARCOLA's gift; and it pays for itself in an amazingly short time. The price is so low it will surprise you—50% higher last year than now.

For the sake of your whole family—your babies especially—go to your Heating Contractor and see our baby today.

The red and yellow card at the right is the sign of a Heating or Sanitary Engineer (formerly called Steamfitter or Plumber) who can show you ARCOLA. Look for it in his window.

It will pay you to consult him twice a year as you do your Doctor or Dentist. To have him examine and report on your heating and plumbing costs little. It may save you a very great deal.

Was Hit Too Hard.

Over a glass of lemon squash the comedian was telling of his hard lot to a friend.

"It's not a bit of good, laddie," he finished. "I shall leave the stage."

His friend in his inmost thoughts agreed with him, but for the sake of politeness expostulated.

"O, don't do that!" he cried. "If you leave the stage you'll be missed."

Serious Matter.

"You should take up dress reform in your classes."

Many of the girls wear clothes which would not be allowed on the stage."

"Dear me. This must be rectified at once. Because—"

"Some of the girls are thinking of going on the stage."—Judge.
